About the CDC Eviction Moratorium

This month, [the CDC announced a temporary halt to evictions](#) of consumers earning no more than \$99,000 a year.

We are confident that the CDC, federal, state and local legislators are making decisions [based upon inaccurate information](#) fed to them by anti-small business and anti-investor sources.

To see relevant documentation for this moratorium, check out the indianastatereia.org page.

Indiana State REIA's goal is to be PROACTIVE in continuing our fight against harmful legislation to Indiana Housing Providers. Legislation that requires you to provide housing without compensation, or that otherwise requires you to bear financial burdens that should not be your responsibility.

Indiana has always been a profitable and business friendly state to do business in. Indiana State REIA is fighting to keep it that way!

But we need your support to help overturn anti-investor legislation, so please donate and help us reach our goal of \$100,000!

All funds will be used for lawsuits, lobbying and public relations to fight anti-investor legislation.
